Employee Verification Service (EVS)

Advantage offices have the ability to create and submit the EVS file to the SSA for clients who have given written authorization. This service verifies the client's record of current or former employee names and social security numbers against the SSA's records. The SSA returns a file that contains a list of any name and social security number discrepancies. This file will then be forwarded to the client for further investigation into each employee listed as a discrepancy.

Client #: _____

Client Name: _____

I give Advantage Payroll Services permission to complete the Employee Verification Process on behalf of my company.

Name(print) _____ Date _____

Signature _____ Title _____
